Workshop Series “The Hacked Barbie”, with 8 editions and 73 participants. A dissemination activity of Excel-The Pursuit of Excellence. The workshop series invites participants to reproduce themselves on a Barbie, a symbol of gendered perfection, (or an another doll perceived as comfortable for the gender identification), in order to unfold meanings connected to body practices, choices, and cosmetic routines generally invisible. The goal is to start a path of self-reflection to develop a more conscious and critical gaze on the social performance through the body.
